

## *OpenTrac Enterprise*

Adaptable and Flexible  
Enterprise Resource  
Management

*OpenTrac Enterprise™ is a complete sales and manufacturing software solution designed exclusively for toll processors, service centers, and producers in the metals industry.*

- Delivers real-time, transaction managed information to multiple plant locations, suppliers, and customers.
- Provides tools to manage entire operations effectively and efficiently, and increases supply chain visibility.
- Gathers and disseminates critical metrics on all aspects of the supply chain which allows outside vendors, regardless of technical capabilities, to become effective business partners.
- Offers instant knowledge of all aspects of the manufacturing processes and identifies potential workflow interruptions.
- Reduces the burden on network infrastructure and shortens software update cycles—allowing customers to concentrate on their operations.
- Adapts to the user by integrating customers' supply chain management needs into the OpenTrac Enterprise™ system.
